

Bio Fertile

Bio-Fertile £10 250ML

To be used as an aid for old problematic pigeons during breeding. Vitamin A and E are fat soluble and therefore do not mix with water. In Bio-Fertile the product has been emulsified for water use.

Instructions for use.

2ml to 1 litre of water for 5 -7 days 2 weeks before breeding, then 1 day a week.

Ingredients

Additives per KG

Vitamins, pro-vitamins & similar substances and well effects chemically well-defined analogue.

E762 Vitamine A 1,250,000 I.U.

3A700 Vitamin E/all-rac alph- tocopheryl acetate 15,000 MG

Oligo elect compounds E8 selenium (sodium selenite) 10 MG

Emulsifiers, stabilisers, thickening agents and gelling agents.
